

INVITO SURVEY SSH

The Society for Simulation in Healthcare (SSH) is looking for your input and expertise.

SSH is committed to ensuring that the Certified Healthcare Simulation Educator (CHSE) and Certified Healthcare Simulation Operations Specialist (CHSOS) exams are relevant and valuable. To do this, an analysis of practice must occur at regular intervals, and has many systematic steps to ensure that the results are reliable and valid.

One key step is to survey the community served by the certifications to ensure that the expected fundamental skills and knowledge tested by the exam are representative of the practice of healthcare simulation, regardless of the location, modality, or profession in healthcare.

Today, we are asking for your participation in completing one or both of the surveys below. Your response will help inform the practice analysis and ensure the certifications evolve appropriately.

We expect that each survey will take approximately 30-40 minutes to complete. You can save your progress and return to complete the survey as your time allows.

Please complete the survey(s) by April 13, 2018, 5:00 pm EST.

Thank you to our many global partners who have participated in this process and to you for taking the time to respond to one or both surveys.

Sincerely,

The Society for Simulation in Healthcare Certification Council
